Cable Management Bar Instructions

1. Mount the wire management bar to the rear of a 19 inch cable management rack with the included mounting screws and washers. If possible, position the wire management bar directly behind a front mount 19 inch cable manager.

2. Mount patch panel(s) to the front of the cable management rack. Route cables above and below the wire management bar.

3. After completing terminations, secure cables to the wire management bar with cable ties…

4. or Siemon VCM (P/N: RS-VCM) series hook and loop cable managers.
   Note: It is recommended to route one half of the cables to the right and the other half to the left of the rack as shown.
