To assist safe installations, comply with the following:

A. Use caution when installing or modifying telecommunications circuits.
B. Never touch uninsulated wire terminals unless the circuit has been disconnected.
C. Never install this device in a wet location.
D. Never install wiring during a lightning storm.

1. Determine where on the internal horizontal rails you’re required to provide cable support.
2. Place the cable tray onto the rails to determine the best locations for the “cage nuts” that are required to be installed into the horizontal rails.
3. Remove the panel, and install the necessary number of cage nuts.
4. Place the cable tray back on to the horizontal rails and secure with the #2 Phillips screws provided.
5. Repeat these steps for each additional cable tray.

NOTE: A total of (4) Cable Trays can be installed on each side of the cabinet.

Parts Description
- VPOD Internal Cable Tray
- (4) Phillips Head Screws
- (4) Plastic cup Washers
- (4) Cage Nuts

Required Tools
- #2 Phillips Screw Driver
