VPOD VPC Installation Instructions

To assist safe installations, comply with the following:
A. Use caution when installing or modifying telecommunications circuits.
B. Never touch uninsulated wire terminals unless the circuit has been disconnected.
C. Never install this device in a wet location.
D. Never install wiring during a lightning storm.

Make sure both cabinets that the VPC will be installed between, are level and properly bayed together using all (4) baying brackets. See Baying Instructions.

Install the (4) shoulder bolts provided onto the inside of the VPOD Frame as shown, using the 5/32" Allen Tool. The VPC may be mounted in the top half or bottom half of space between bayed cabinets.

Place the VPC over the (4) shoulder bolts and hook the back plate into place.

Install the (2) cable management fingers to each side of the VPC using the (4) Phillips screws and washers as shown.

Snap the VPC cover over the cable management fingers as shown.

Parts Description
VPOD Vertical Patching Channel
