

# CT<sup>®</sup> 5e COUPLERS

The engineering innovations used in the design of the CT 5e couplers ensure full-featured end-to-end category 5e connectivity. The couplers feature universal T568A/B wiring and comply fully with all applicable ISO and TIA specifications for all pair combinations.

Clear plastic cover protects circuitry from accidental damage

Snap-in colour-coding icons are included (red, blue, and matching) allowing users to instantly identify different types of services

Patented compliant pin technology allows use of Siemon's 4-pair impact tool to minimize termination time

Cable-tie anchor points provide effective strain relief for cables entering from top or bottom of coupler

**PATENTED**

**160 MHz**

Featuring T568A/B wiring with component and channel performance to 160 MHz.

Angled CT 5e Couplers are available with optional spring doors to protect modular jacks from outside contaminants

**Technical Tip!**

Angled couplers are recommended for work area applications and flat couplers for patch panel applications

Patented "reactive balance" technology provides exceptional category 5e transmission performance

Patented gravity-feed design controls bend radius of mated modular cord. The angled shroud protects the connection point from being physically disturbed

Snaps quickly into CT faceplates or patch panels and can be easily removed using a small screwdriver to access terminated cable
