

Z-MAX™ 6A F/UTP TRUNKING CABLE ASSEMBLIES

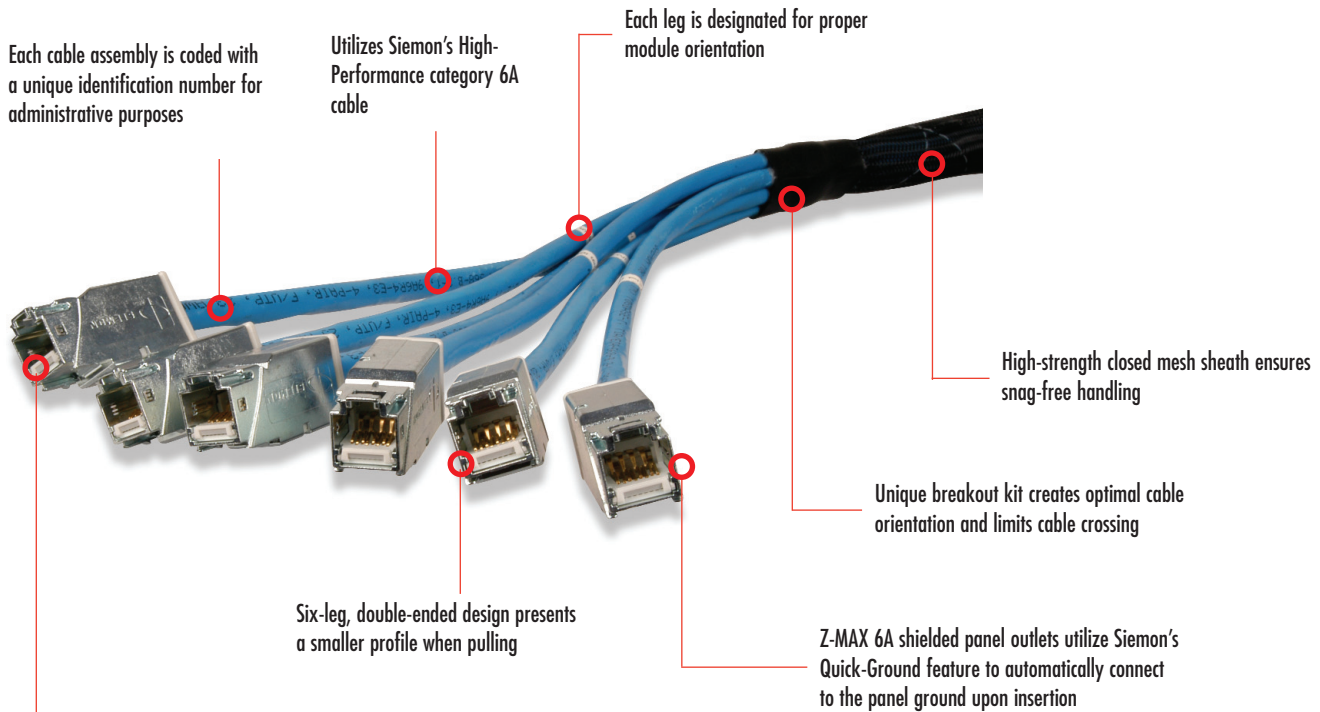

Siemon's Z-MAX 6A F/UTP copper trunking cable assemblies combine the 10 Gb/s performance and security of a shielded category 6A solution with the ease and efficiency of a pre-terminated cable assembly. Featuring factory terminated and tested Z-MAX 6A shielded modules and Siemon category 6A F/UTP cable, Siemon copper trunking cable assemblies were designed to enable rapid deployment of data centers. These provide an efficient and cost effective alternative to individual field-terminated components. In addition to providing simple, consistent and aesthetically pleasing cable management, the assemblies allow significantly reduced field installation times.

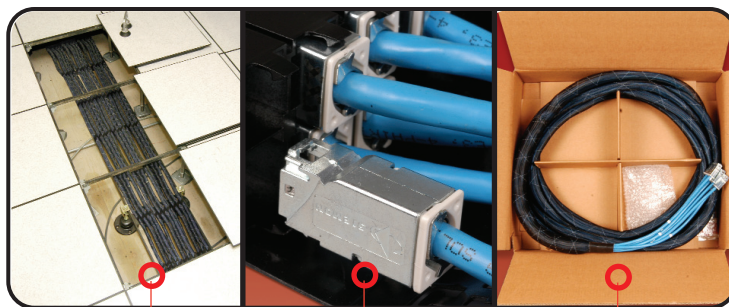

PATENT PENDING

Z-MAX™

Utilizes Z-MAX 6A shielded panel outlets to quickly snap into Z-MAX panels

Ideal for Data Center, raised floor and ladder rack environments resulting in up to 75% faster deployment

Simple installation — pre-terminated Z-MAX panel outlets snap easily into Z-MAX panels. Trunking cables are also available with hybrid, shielded Z-MAX outlets for use with TERA®-MAX® panels

Each assembly is packaged individually to protect factory terminations
