

# Siemon 5 SQUARE® Telecommunications Outlet Box

Siemon's 5 SQUARE® telecommunications outlet box was specifically designed to support today's high-performance copper and fiber optic cabling systems, providing 50% more useable space than traditional 4 square boxes. This additional space simplifies installation and cable management and helps maintain the strict bend-radius requirements of high-performance systems such as category 6A and category 7A copper while leaving room for future upgrades and expansions.

**50% More Space** – Siemon's 5 SQUARE box provides 64 cubic inches of useable space versus just 30-42 cubic inches for standard boxes

**Integrated Cable Management** – 5 SQUARE is the only telecommunications outlet box with an integrated cable management system

**Manage Bend Radius** – Supports bend-radius requirements of high-performance cabling to ensure proper consistent performance

**Support Larger-Diameter Cables** – Provides additional space for management of larger diameter cables, such as category 6A UTP

**Flexible Mounting** – Standard and bracket-mounted versions feature multiple conduit knockout options

**Installation Options** – Available with single and double-gang extension rings with depths up to 1 1/4"

**Faceplate/Box Compatibility** – Plaster/Reducer rings provide compatibility with all US style Siemon and 3rd party single and double gang faceplates, as well as Siemon MX-SM Surface-Mount Boxes, Fiber Outlet Boxes and MuTOA's.
