

# Category 7 600 MHz Cable - International

Simon's Category 7 600 MHz cable perfectly complements the performance of our TERA outlets. Simon cable exceeds all ISO/IEC requirements for category 7/class F transmission performance beyond 600 MHz. A fully shielded cable with individual foils around each pair coupled with an outer braid provides perfect immunity from outside interferences. In addition, the cable jacket has been qualified for mechanical reliability in high temperature environments up to 75°C. In PoE remote power applications, this cable can be installed in environments up to 60°C and will not experience degradation due to heat rise inside the cable bundle. Simon cable is the ideal way to ensure optimum channel performance and is essential for a complete end-to-end warranted solution.
