

Z-MAX™ 6A UTP PATCH PANELS

Z-MAX 6A UTP patch panels harness unprecedented performance and reliability in a high-density modular solution. These complete patch panel kits combine 19 inch patch panels with Z-MAX 6A panel outlets to offer the industry's highest performing category 6A patching solution.

The Z-MAX 6A UTP patch panels facilitate a world-class installation for data centers and telecommunications rooms by offering an attractive appearance combined with flexible labeling and color coding options.

The Z-MAX panel modules feature a patent pending angled IDC contact pattern to exploit the widest module cross-section to minimize alien crosstalk. This enables up to 48-ports in just 1U while still meeting strict category 6A AXT requirements. Panels are offered in flat and angled styles with fixed or removable rear cable managers.

Additional space is provided for custom user labeling

High visibility snap-on magnifying label holders except either paper labels or Z-MAX icons for port identification

Lightweight, high strength steel with durable black finish

A quick-release lever allows individual modules to be easily removed even in high density applications

Panel outlets easily snap into place to accelerate installation

Bold port numbering enables quick identification of outlets

Rear cable manager ensures proper cable management practices for all installations, critical to category 6A performance

Panels are provided in complete kits which include the patch panel and Z-MAX panel outlets

Leverage the quick-snap design by combining Z-MAX trunk assemblies with empty Z-MAX patch panels

High density version provides 48 ports in just 1U to reduce valuable rack space consumption
