

For Immediate Release

## Siemon Continues Environmental Stewardship with New Bulk Packaging Options for Fiber Pigtails

April 6, 2017. Watertown, CT — Siemon, a leading global network infrastructure specialist, today announced the addition of a bulk packaging option for its line of XGLO® Fiber Optical Pigtails. An expansion to its line of Lighthouse Advanced Fiber Cabling Solutions, these 900-micron buffered pigtails are security packaged in a protective recyclable container. Aligned with Siemon's commitment to delivering installer-friendly solutions and protecting the environment, this bulk packaging option eliminates individual bags for reduced installation time and waste.

Ideal for splicing applications, the bulk fiber pigtails come in both OM3 and OM4 multimode and singlemode fiber types in fiber counts of 12 for SC connectivity and in 12 or 24 for LC connectivity. The pigtails are available with a TIA/EIA-598-C color code option for easy identification when splicing, ensuring continuity of color codes throughout a cable run. The singlemode pigtails also include an APC style connector option to support passive optical networks, CATV and FTTX applications.

"At Siemon, we are always looking for new ways to provide cost savings to our customers, while also considering our ongoing commitment to protecting the environment," says Kevin Stronkowsky, fiber product manager for Siemon. "Not only do these bulk package pigtails eliminate individual bags for reduced labor, freight and waste, but they also provide a savings over non-bulk pigtails that help our customers lower their total bill of material cost."

Siemon's new bulk package XGLO fiber optic pigtails exceed TIA/EIA and ISO/IEC specifications, including insertion loss and return loss performance, and they offer a superior connector polish that meets stringent Telcordia and ISO/IEC specifications for end-face geometry. Warranted for 20 years when installed in a qualified Siemon XGLO system and inspected to ensure superior performance and quality, these bulk packaged pigtails come in 1 and 5 meter lengths and in both riser and low-smoke zero halogen (LS0H) jacket ratings to meet a wide range of requirements.

### About Siemon

Established in 1903, Siemon is an industry leader specializing in the design and manufacture of high quality, high performance IT infrastructure solutions and services for Data Centers, LANs and Intelligent Buildings. Headquartered in Connecticut, USA, with global sales, technical and logistics expertise spanning 100 countries, Siemon offers the most comprehensive suites of copper and optical fiber cabling systems, cabinets, racks, cable management, data center power and cooling systems and Intelligent Infrastructure Management solutions. With more than 400 patents specific to structured cabling, Siemon Labs invests heavily in R&D and the development of Industry Standards, underlining the company's long-standing commitment to its customers and the industry. Through an ongoing commitment to waste and energy reduction, Siemon's environmental sustainability benchmarks are unparalleled in the industry, including 179% global carbon negativity and zero-landfill status

Siemon Interconnect Solutions (SIS) is a Siemon business unit comprised of a team of dedicated technical sales professionals supported by Siemon Labs, mechanical, electrical and signal integrity engineers committed to solving industry and customer driven interconnect challenges. We provide custom network infrastructure solutions to: OEM's, Leading Manufacturers, Value-Added Resellers and System Integrators.
