For Immediate Release

Siemon Receives Network World Middle East Cabling Vendor of the Year Award

April 11, 2017. Watertown, CT - Siemon, a leading global network infrastructure specialist, is pleased to announce that it was awarded Network Cabling Vendor of the Year during the 8th Annual Network World Middle East Awards. Hosted by Computer News Middle East (CNME), Siemon was selected as a finalist from a pool of over 250 nominations by an esteemed panel of judges. CNME readers were then able to vote online for the winners of each category.

Held in Dubai at the luxurious Habtoor Grand Resort and Spa Hotel, the event celebrated networking excellence and spotlighted organizations that continue to innovate and strive for success. This year's Network Cabling Vendor award was based primarily on the success of Siemon's ConvergeIT™ Cabling Solution for Intelligent Buildings, a unified structured cabling solution that converges critical data, voice, video and low-voltage building systems onto a single unified physical infrastructure, providing significant cost savings and sustainability over the life of the facility. Strategic partnerships such as Siemon's participation within Cisco's Digital Building Solution and alliances with digital lighting partners, as well as informative technical white papers, were also instrumental in earning Siemon a nomination.

"We are honored to be recognized at this year's Annual Network World Middle East Awards for our dedication to excellence within the industry," says Mennat El Nazer, Marketing Communications Executive, for Siemon Middle East and Africa. "Siemon is continuing to support the rapid advancement of intelligent buildings around the globe with programs such as ConvergeIT. By supporting a facility's various low-voltage applications on a single IP-based structured cabling system rather than on separate and often proprietary cabling plants, ConvergeIT is taking the intelligent building approach a step further."
