For Immediate Release

Siemon Partners with Maya HTT's DCIM solution Datacenter Clarity LC

August 7, 2018. Watertown, CT - Siemon, a leading global network infrastructure specialist, is pleased to announce that it has partnered with data center infrastructure management (DCIM) solution provider Maya HTT, whose Datacenter Clarity LC DCIM platform will provide Siemon customers with the tools to accurately and efficiently manage their data center infrastructure.

Datacenter Clarity LC allows users to manage their data center infrastructure with powerful tools and a real-time picture of asset attributes in 3D. The ability to track unlimited assets at unlimited sites makes Datacenter Clarity LC ideal for colocations, multi-tenant and hyperscale environments. The platform features a user-friendly web interface that tracks, manages and locates circuits and connections, creates floor layout and rack elevation renderings in both 2D and 3D views and delivers real-time monitoring via power distribution units (PDUs) with alarm notifications via email and SMS. Datacenter Clarity LC works seamlessly with Siemon's WheelHouse Advanced Data Center Solutions, including cabinets, racks, cable management, copper and fiber connectivity, and PowerMax PDUs.

"As data centers continue to become more complex, it is vital to accurately track and manage data center infrastructure" says Frank Velleca, Siemon's Market Manager for Strategic Projects. "Siemon's partnership with Maya HTT, the most powerful real-time monitoring engine on the market, allows our customers to optimize equipment placement and energy consumption to create the most efficient configuration for their data center."

"Datacenter Clarity is described by our customers as the tool they need to make very critical, timely, and expensive decisions in real time to meet their customers' expectations and business requirements," says Rene Pronovost, Maya HTT's Director of Operations for Datacenter Clarity. "Siemon's partnership and expertise in the data center industry fit well with the Datacenter Clarity DCIM offering and will open the door to equipping data centers with the most comprehensive AI-enabled DCIM solution on the market."

For more information about Siemon's partnership with Maya HTT and the Datacenter Clarity LC DCIM platform, visit www.siemon.com/dcim.
