Financial Services

Siemon *Success* Solution

Customer Overview

CrediBanco Visa

- Headquartered in Bogota, Colombia
- One of the top ten financial companies in Colombia

Challenge

To maintain their competitive advantage and improve already high service levels, Credibanco Visa, one of the largest financial companies in Colombia, set an aggressive plan to launch new bandwidth-intensive IP services to employees and external customers. For this major upgrade, critical Credibanco Visa departments, such as Support Service, Administration, Credit Card Center and Tech Support would increasingly depend on the quality, performance and capacity of the network to operate efficiently

Solution

With that in mind, Credibanco Visa chose Siemon's 10G *ip*® UTP cabling solution for their mission-critical data center. This 10Gb/s-capable solution has the capacity to support network speeds both today and into the future. For horizontal connections, they selected a 1Gb/s-capable Siemon System 6® UTP solution. Totalling approximately 2000 drops, both the data center and horizontal cabling infrastructures utilize Siemon end-to-end solutions.

Results

Credibanco Visa now supports their employees and customers with the performance and future-proof security of a 10Gb/s infrastructure in their data center as well as robust 1Gb/s performance at the desktop.
