

# HIGH PERFORMANCE

## PLUG AND PLAY CABLE BUNDLES

### Preconfigured Solutions

Siemon Interconnect Solutions' (SIS) high performance cable bundles are ideal for hyper-scale rack and stack data center rollouts where maximizing efficiencies are critical. These cable bundles are custom configured, assembled and 100% tested in our ISO-9001-2015 manufacturing facilities ensuring reliable, high quality, high performance cable assemblies needed for critical networking. Ensure a custom tailored solution by working with our data center design team to specify the cable configuration which meets the project specific application requirements. Each leg of the cable bundle has a staggered length that minimizes excess cable slack, improve cable management, increase airflow and provide a clean customized appearance. With a large selection of connectors and cable types available, Siemon Interconnect Solutions has the ability to supply custom configured cable bundles to support the flexible and scalable needs of today's data centers.

### The Siemon Difference

Using our large product mix of high performance cabling solutions, SIS can help improve efficiency and deployment speed of data center systems. Our customizable Intra-cabinet bundled solutions feature the highest quality cables and best in class routing. These bundles include highly visible labeling for increased installation efficiency and easy serviceability in the field.

### Features and Benefits

- Plug and Play ready, saving time and labor during deployment
- Superior cable performance and confidence with 100% testing on each bundle
- Improved cable management for best airflow
- Customized to customer specific system needs
- Short lead-times, reliable, serviceable and scalable

Organized wire structure for better airflow

#### Applications

Ethernet 1G, 10G, 25G, 40G and 100G  
Infiniband SDR, DDR, QDR, and EDR  
ToR / MoR Switch  
Switch to Switch  
Switch to Server  
Switch to Storage

#### Connectors

SFP+ / SFP28  
QSFP+ / QSFP28  
MTP  
LC Duplex  
RJ45

#### Cable Types

Direct Attach Twinax  
Direct Attach Fiber  
SM and MM Fiber  
UTP Copper Cable  
Shielded Copper Cable
