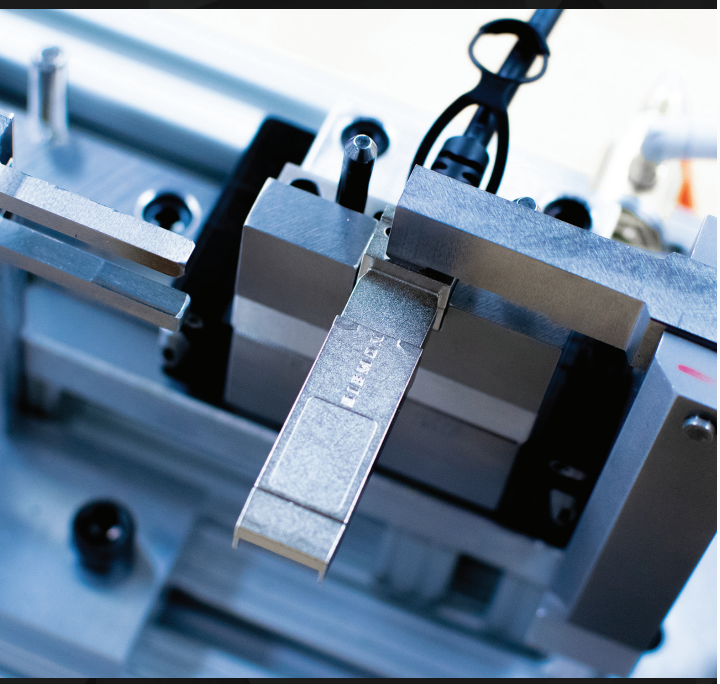
COMPANY OVERVIEW



SIEMON™

Established in 1903, Siemon is a leading global IT infrastructure provider, delivering innovative physical layer solutions and services for Data Centers, LAN's, and Intelligent Buildings.

Our Global Headquarters and core production facility are anchored in Connecticut, USA. We design and manufacture a comprehensive suite of high-performance copper and optical fiber cabling systems, racks, cable management, and Intelligent Building solutions. Our innovative products come with deployment services, technical expertise, and logistics resources spanning over 150 countries.

Advanced Data Center Solutions

Whether it's an on-site data center, a colocation space, or a hyperscale environment, we support our clients data center requirements by delivering world-class IT infrastructure that truly connects people to a higher standard. Our mix of end-to-end structured cabling, high speed interconnects, and expert design services will help support your journey to 400/800G and beyond.

Design, Delivery, Deployment

Every Siemon solution is backed-up by our expert support teams that combine to help you reduce risk, maximize uptime, and deliver new applications and services on time and on budget. Some of our value-add resources include: DC Design and Intelligent Building services, a global network of highly trained Certified Installers, local stocking distributors and logistics partners, turnkey project management services through Siemon Global Project Services, and more.
