

Siemon Advanced Data Center Solutions & Services

Pre-Terminated MPO/MTP Assemblies

Our BASE-8 and BASE-12 MPO/MTP trunks are engineered for flexibility and built to your exact application needs. With reduced-diameter RazorCore™ cable and optional MTP Pro® connectors, they provide the perfect foundation for high-density, ultra-fast data center deployments.

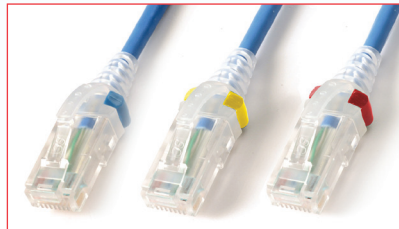

High-Speed Cable Assemblies – DACs & AOCs

Siemon provides a complete portfolio of High-Speed Cable Assemblies – supporting up to 800G – including Direct Attach, Active Copper, Active Electrical, and Active Optical Cables. Available in a wide range of popular form factors such as SFP, QSFP, QSFP-DD and OSFP, these solutions deliver performance and flexibility for next-generation data center applications.

LC BladePatch®

LC BladePatch provides ultra-low loss performance, supporting the precise optical performance requirements for high-speed networks. The LC BladePatch is ideal for patching high-density blade servers, patch panels and equipment. The small-diameter cable improves airflow and cable management.

SkinnyPatch® Shielded Modular Cords

Siemon SkinnyPatch category 6A/6 Shielded Modular Cords deliver superior performance with a reduced cable diameter for improved airflow and increased flexibility in high-density patching areas.

Ultra-High-Density Patching

LightVerse® and LightStack® offer unmatched flexibility, with densities ranging from 96 to 144 fibers per rack unit. Designed in a variety of sizes, these systems seamlessly adapt to the needs of today's most demanding data center environments.

Data Center Infrastructure That You Can Trust

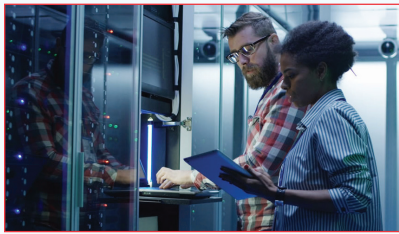

LightVerse® Panel Solutions

The LightVerse Fiber Optic System comes in 1U, 2U and 4U configurations, supporting 96 fibers per 1U of rack space. The exceptional appearance, modularity, cable management, and labeling make it ideal for high-density patching areas.

Quick Ship Programs

We realize how important product availability and speed of deployment are for your data center projects, so we've developed the FiberNow™ and RapidDAC™ services to deliver our industry-leading fiber optic cabling and direct attach copper (DAC) assemblies in 5 days or less.

Siemon Data Center Services

Our elite Global Data Center Services Team can produce custom solutions to address the precise pain points you are aiming to resolve. With their extensive knowledge of technology roadmaps, they offer prompt support to adapt to evolving needs, minimize downtime, and optimize performance.

Siemon Global Account Services

Our Global Account Services Team delivers White Glove Services, encompassing quote and supply-chain management, project transparency, product support, logistics coordination, technical assistance, warranty execution, and more.

Global Footprint

Siemon is a global organization and boasts in-house manufacturing locations around the world that meet COO requirements. We have 7 manufacturing & warehousing sites and operate in 40 countries covering North America, Latin America, Asia Pacific, India, Australia, and more.
