

# Siemon GenAI Solutions & Services

Siemon is at the forefront of the GenAI revolution, and through collaboration with our customers and partners who are already delivering these technologies, we've developed a range of next-generation AI-Ready solutions and services that are ready to support your deployments.

## Pre-Terminated MPO/MTP Assemblies

Our BASE-8 and BASE-12 MPO/MTP trunks are engineered for flexibility and built to your exact application needs. With reduced-diameter RazorCore™ cable and optional MTP Pro® connectors, they provide the perfect foundation for high-density, ultra-fast data center deployments.

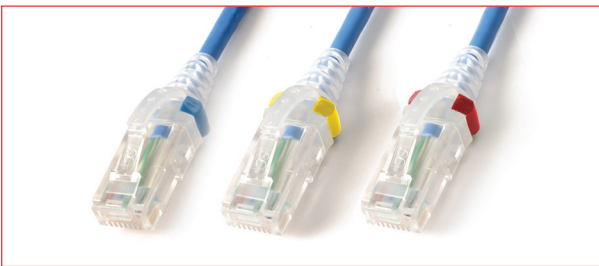

## High-Speed Cable Assemblies

Siemon provides a complete portfolio of High-Speed Cable Assemblies – supporting up to 800G – including Direct Attach, Active Copper, Active Electrical, and Active Optical Cables. Available in a wide range of popular form factors such as SFP, QSFP, QSFP-DD and OSFP, these solutions deliver performance and flexibility for next-generation data center applications.

## LC BladePatch® Jumpers

Siemon's innovative LC BladePatch provides ULL performance, supporting the precise optical performance requirements for high-speed networks. Ideal for patching high-density blade servers, patch panels and equipment, LC BladePatch's small-diameter cable improves airflow and cable management.

## Copper Connectivity

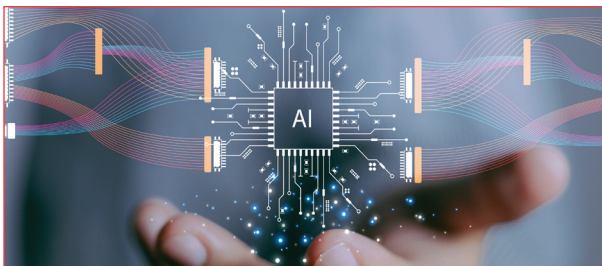

Siemon's range of category 6 and 6A copper connectivity solutions are ideal for out-of-band management in AI deployments. Delivering superior performance, and available in a variety of cable diameters, they provide maximum airflow management and flexibility in high-density patching areas.

## LightVerse® Fiber Connectivity

Supporting up to 48 duplex or 48 MPO ports per 1U, as well as mixed copper and fiber connectivity via the innovative combo panel, LightVerse's combination of industry-leading Ultra-Low-Loss (ULL) performance, exceptional appearance and modularity make it ideal for high-density patching areas.

# Siemon GenAI Solutions & Services

## Siemon is AI-Ready

Siemon already has everything you need to support GenAI. From third-party verified ULL fiber connectivity, to full APC offerings including multimode, complete support for hybrid cabling as well as high-speed DACs and AOCs to support InfiniBand and Ethernet we've got your needs covered.

## Global Account Services

Our white glove service streamlines your data center deployments, providing you with a single point of contact that supports your teams coordinate quote and supply-chain management, provide project transparency, product support, logistics coordination, technical assistance, warranty execution, and more.

## Data Center Services

We've focused our experience into a global service network, created to guide you through the process of selecting and designing the underlying infrastructure you need. We also deliver on-going support to respond quickly to changing needs, prevent downtime and maintain peak performance.

## Quick-Ship Programs

We realize how important product availability and speed of deployment are for your data center projects, so we've developed the FiberNow™ and RapidDAC® services to deliver our industry-leading fiber optic cabling and direct attach copper (DAC) assemblies in 5 days or less.
