

Siemon: Your Trusted NVIDIA Solution Advisor

Siemon has joined the NVIDIA Partner Network (NPN) as a Solution Advisor. Together, we provide cutting-edge solutions that address your data center and AI challenges.

The NVIDIA Partner Network (NPN) is an ecosystem of NVIDIA experts who possess the knowledge and skills to help customers overcome their most complex problems and accelerate their business with NVIDIA solutions.

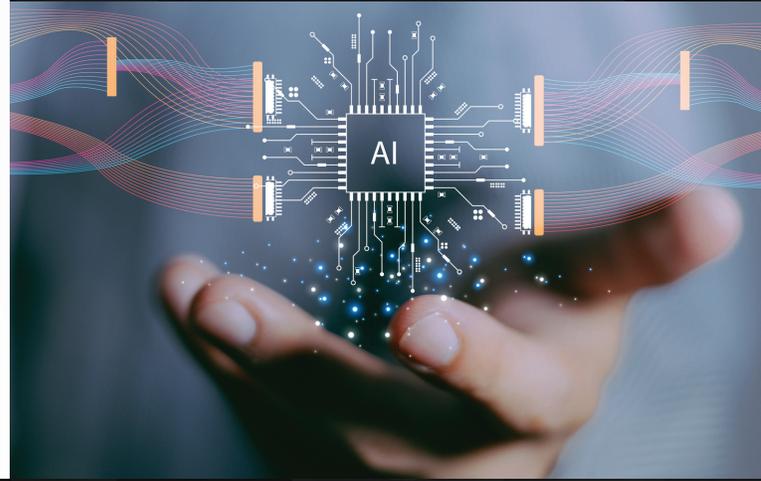

A Solution Advisor is a partner who offers expert advice and consultation services to customers seeking to implement NVIDIA-based solutions or technology.

By combining NVIDIA's AI expertise with Siemon's deep infrastructure knowledge, we offer end-to-end products and services – from design to implementation and support – for high-performance networking solutions tailored to your exact needs.

GenAI is Revolutionizing Data Center Design ▶

GenAI's explosive growth demands a radical overhaul of data center infrastructure. To handle the immense computational power and data demands of AI, you need innovative solutions for networking, power, cooling, and cabling. Are you ready for the Generative AI revolution? We are.

◀ Optical Patching Solutions

Siemon optical patching solutions fully comply with NVIDIA's optical reach specifications. By accommodating the required four optical connectors across two patch panels, we offer customers maximum flexibility and simplified management for their network infrastructure. Siemon also offers a full range of NVIDIA-compatible straight and splitter crossover fiber cables in MM & SM.

High-Speed Cable Assemblies ▶

Siemon offers a wide range of high-performance DACs and AOCs for point-to-point connections, supporting speeds from 10G to 800G across various applications with Ethernet or InfiniBand. Independently tested for compatibility with NVIDIA and other major equipment brands, our assemblies are available in OSFP-FT, OSFP-RHS, QSFP-DD, QSFP56, QSFP28, QSFP+, SPFD, SFP28, and SFP+ form factors in straight-thru and breakout configurations.
