
RUGGEDIZED CABLING SOLUTIONS

SIEMON™

NOTHING SHOULD GET BETWEEN YOU AND YOUR DATA.

Siemon's ruggedized cabling solutions ensures your data remains uncompromised. Experience proven reliability with category 5e, 6, and 6A unshielded/shielded copper, and duplex LC multimode/singlemode optical fiber ruggedized systems.

Trust Siemon solutions to protect your critical network connections from:

- Mechanical Stress
- Physical Tampering
- Climatic Elements
- Electromagnetic Interference (EMI)
- Chemical Pollutants
- Ingress of Particulates and Liquids

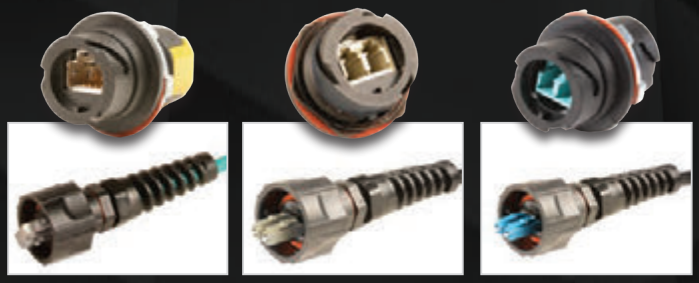
Innovative Connecting Hardware

Siemon's exclusive quarter-turn tamper-resistant bayonet-style outlet and plug housings ensure IP66/67-rated ingress protection. Compression fittings with gripping ribs are easy to handle, provide superior seals, and protect cable bend radii.



A Robust End-to-End Solution

Our comprehensive ruggedized package features a wide range of products, including indoor/outdoor and outside plant cables, patch cords, and optical fiber jumpers. Experience seamless integration with bulkhead fiber adapters, outlet-to-outlet couplers, and innovative accessories like angled category 5e plug assemblies, field-terminated category 6A Z-PLUG™ with protective glands, tethered plug and outlet dust caps, and M12 D coded cable assemblies.

Versatile Mounting Options

All Siemon ruggedized connecting hardware can be mounted in rear gasket sealed IP44 rated 1-, 2- , 3- and 4-port stainless-steel faceplates or IP66/IP67 (NEMA 4X) rated 1-, 2-, 3-, and 4-port surface mount boxes. Angled 4-port and single opening DIN rail mounted patch panels support copper and optical fiber connections inside control panels and distribution cabinets.
