

RS-B Structural Reinforcement Bracket Instructions

1 Place the brackets on the inside of the channels in the location where the equipment or shelving is to be mounted.

2 Secure the brackets to the rack using the #12x24 screws provided in the rear channel mounting holes only.

Note: Four screws are provided for each bracket - two for the front and two for the rear.

3 Mount the equipment or shelving directly over the front of the brackets by installing the #12x24 screws provided through the same mounting holes in both the bracket and the rack.

Note: For equipment or shelves greater than 3 RMS (5.25 in.), two sets of brackets are recommended.
