

DataKeep™ DC Cabinets

Regional Availability - Europe, Eurasia & Middle East

Siemon's comprehensive line of DataKeep DC Cabinets combine density, accessibility and efficiency with an attractive, robust construction for today's data centre environments. Whether housing critical network switches, servers, patching environments or a combination of active and passive equipment, DataKeep DC Cabinets are available in multiple sizes with a full range of features that make them ideal for use as a standalone network or server cabinet or in a multi-bayed aisle configuration. DataKeep DC cabinets are available in a variety of height, width, depth and color combinations with several door options and a range of handle and locking styles, including key, 3-digit combination and 4-point locking.

Superior Ventilation

Vented side panels, top and bottom brush entry, and optional fan trays ensure efficiency

Door Options

Quick-release hinge doors in full mesh and split mesh with 82% airflow, as well as split solid and full vented solid

Multiple Configurations

Available in a variety of size configurations and in black, white or grey color options

Robust Construction

Durable bolted steel construction with up to 1000kg load weighting

Side Panels

Sturdy, lockable and removable side panels

Base Fitting Options

Various options for leveling feet and casters available

Zero-U Option

800mm-wide cabinets feature zero-U space on each side for cable management, patching and PDUs.

Superior Security

Swing handle available with 4-point locking, as well as key lock and 3-digit combination options.

Pack Options

Supplied fully assembled or flat packed.
