

# MAX® Horizontal Secure Faceplates

## Regional Availability - Australia & New Zealand

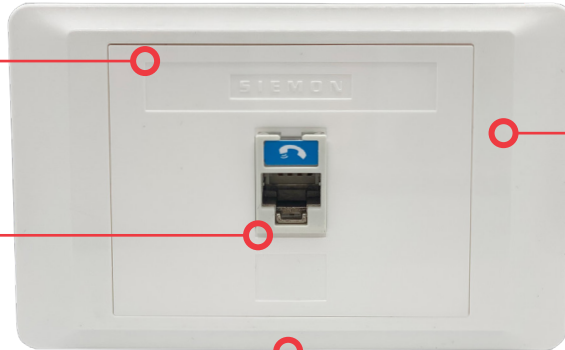

The MAX series horizontal secure faceplates provide a tamper-proof, low-profile solution for mounting Z-MAX®, TERA® and both angled and flat MAX outlets. The design features a cover and one-piece base which accepts up to four outlets.

### Label Location

The faceplate has depressed labelling areas above and below the ports to allow easy attachment of labels

### Installation Flexibility

Z-MAX, TERA, and MAX designs allow outlets to be side-stacked and inserted from either front or rear of faceplates

### Colour Options

Faceplates available in black and white

### Tamper-Proof

Secure plate is ideal for environments such as schools and public places to deter tampering

Secure screw

## MAX® Horizontal Secure Faceplates

Siemon's secure single gang horizontal faceplate for Z-MAX, TERA or MAX outlets

MX-HFPL-(XX)-(XX)

### Ports

01 = 1 Port  
02 = 2 Port  
04 = 4 Port

### Colour

01 = Black  
02 = White

1-port faceplate

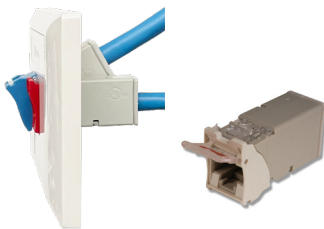

2-port faceplate

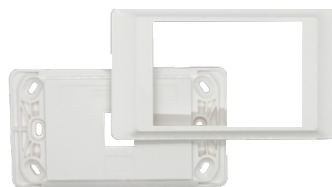

4-port faceplate

Faceplates include mounting screws and secure screw

### Installation Versatility

Z-MAX provides a single hybrid outlet that supports both angled and flat mounting orientations. The spring door outlet option minimizes exposure to contaminants.

### Dual Layer

Removable snap-on cover plate enables easy mounting and improves aesthetics in the work area.

### Protection

The secure plate cannot be removed by hand. The secure plate has a cover plate that can only be removed with a screwdriver.

Because we continuously improve our products, Siemon reserves the right to change specifications and availability without prior notice.
