

SkinnyPatch® 6A UTP Modular Cords

Regional Availability - North America

Siemon's SkinnyPatch 6A UTP Modular Cords deliver category 6A performance with a reduced cable diameter for improved airflow and increased flexibility in high-density patching areas. The cord's smaller 28 AWG stranded copper construction offers a significantly tighter bend radius for easier cable routing and enhanced cable management, providing pathway space savings in racks and cabinets while facilitating moves, adds and changes in tight spaces. These cords also feature Siemon's patented metallic isolator for exceptional NEXT performance and innovative 360-degree crimp for excellent plug-to-cable strain relief. SkinnyPatch 6A UTP cords fully support Category 6A/Class Ea channels backed by Siemon's 25-year system warranty.

Excellent Bend Relief

Boot and integrated strain relief ensures minimum bend radius for category 6A performance

Diameter and Airflow

Smaller diameter cable significantly reduces bundle and pathway fill for space savings and offers improved airflow, accessibility and cable management in high-density applications

Construction

SkinnyPatch offers 40% size reduction over traditional 6A UTP cords for smaller bend radius and easier routing in tight spaces

Color Coding

Optional colored clips enable field color coding and can be easily snapped into place without having to disconnect cords
